Disk Manager Mac User Guide

INTRODUCTION

Disk Manager Mac® Hard Disk Installation Utility for Macintosh is a comprehensive, easy-to-use installation utility. Use Disk Manager Mac to install (format and initialize) any SCSI (Small Computer Systems Interface) hard disk into a Mac Plus, Mac SE, SE/30, Mac II Series, Mac LC/SI or Classic model.

THE README FILE

A file entitled "README" is on your diskette. The README file will provide additional operating instructions and any applicable update information for Disk Manager Mac and the Mounter Desk Accessory. To view the README file, just double click on it. You may also print the README file after you open it, if you have an Imagewriter printer. To do this, just select "Print" from the "File" menu.

INSTALLATION PROCEDURE

If you are not yet familiar with the Apple Macintosh user interface, please consult your Apple documentation now. You may wish to run the Macintosh introduction program by inserting *Your Apple Tour* diskette provided with your Apple System Tools diskettes.

To run Disk Manager Mac, insert your Disk Manager Mac diskette into one of the diskette drives of your computer and turn the computer on. Double-click on the Disk Manager Mac icon to start the program. Select the SCSI hard disk desired. If you have only one hard disk this is already completed for you. If you have multiple hard disks, Disk Manager Mac will indicate the the status of each drive (formatted or unformatted). *Be sure you select carefully at this point, to avoid re-formatting an existing hard disk in your system.* Click "Auto Install" from the Main Screen. This will format and initialize your entire disk. To select interleave, create partitions and to do partial installations, click "Custom Install". Further instructions for using Custom Install are in the README file. You can also get help from the help button on the Custom Install dialog.

MOUNTER DESK ACCESSORY

Included on your Disk Manager Mac diskette is a Desk Accessory (DA) called "Mounter". It enables you to mount and unmount partitions on your desktop. If you want to have the mounter as one of your desk accessories, use the Font/DA Mover utility to install it in your system. A full explanation of the Font/DA Mover Utility is provided in your Macintosh Utilities Guide.
